Preface

This booklet contains the proceedings of the International Workshop on Petri Nets and Software Engineering (PNSE’09) in Paris, France, June 22-23, 2009. It is a satellite event of Petri Nets 2009, the 30th International Conference on Application and Theory of Petri Nets and Other Models of Concurrency.

More information about the workshop, like online-proceedings, can be found at

http://www.informatik.uni-hamburg.de/TGI/events/pnse09/

For the successful realisation of complex systems of interacting and reactive software and hardware components the use of a precise language at different stages of the development process is of crucial importance. Petri nets are becoming increasingly popular in this area, as they provide a uniform language supporting the tasks of modelling, validation and verification. Their popularity is due to the fact that Petri nets capture fundamental aspects of causality, concurrency and choice in a natural and mathematically precise way without compromising readability.

The use of Petri nets (P/T-nets, coloured Petri nets and extensions) in the formal process of software engineering, covering modelling, validation, and verification, are presented as well as their application and tools supporting the disciplines mentioned above.

The intention of this workshop is to bring together research and application to have a lively mutual exchange of ideas, view points, knowledge, and experience. The submitted papers were evaluated by a programme committee, which was supported by several other international experts resulting in four reviews per submitted paper.

The program committee consists of:

Wil van der Aalst (The Netherlands)  Peter Buchholz (Germany)
Didier Buchs (Switzerland)          Piotr Chrzastowski-Wachtel (Poland)
Gianfranco Ciardo (USA)             José-Manuel Colom (Spain)
Raymond Devillers (Belgium)         Zhenhua Duan (China)
Berndt Farwer (United Kingdom)      Jorge C.A. de Figueiredo (Brasil)
Giuliana Franceschini (Italy)       Luis Gomes (Portugal)
Nicolas Guelfi (Luxembourg)         Guy Gallasch (Australia)
Serge Haddad (France)               Xudong He (USA)
Kees van Hee (The Netherlands)       Monika Heiner (Germany)
Vladimír Janousek (Czech Republic)  Gabriel Juhás (Slovak Republic)
Astrid Kiehn (India)                Ekkart Kindler (Denmark)
Michael Köhler-BuKmeier (Germany)   Gabriele Kotis (Austria)
Maciej Koutny (UK)                  Lars Kristensen (Denmark)
Xiaou Li Zhang (Mexico)             Johan Lilius (Finland)
Robert Lorenz (Germany)             Daniel Moldt (Germany) (Chair)
Chun Ouyang (Australia)             Wojciech Penczek (Poland)
Laure Petrucci (France)             Heiko Rölke (Germany)
Sol M. Shatz (USA)                  Christophe Sibertin-Blanc (France)
Natalia Sidorova (The Netherlands)   Mark-Oliver Stehr (USA)
Harald Störrele (Austria)           Ferucio Laurentiu Tiplea (Rumania)
Ulrich Ultes-Nitsche (Switzerland)   Karsten Wolf (Germany)
Jianli Xu (Finland)                 Christian Zirpins (Germany)
Mengchu Zhou (USA)                  Wlodek M. Zuberek (Canada)
We received 22 high-quality contributions. The program committee has accepted eight of them for full presentation. Furthermore the committee accepted nine papers as short presentations. At the common poster session with the workshop on Organizational Modeling (OrgMod’09) one poster is presented. The poster session is in addition open to all participants of the whole conference events to present ongoing work and current / future projects without written submissions.

Daniel Moldt

Acknowledgments

The international program committee was supported by the valued work of additional reviewers, listed below:

   Florencia Balbastro
   Lawrence Cabac
   Alfredo Capozucca
   Raymond Devillers
   Michael Duvigneau
   Steve Hostettler
   Zhaoxia Hu
   Mariusz Jarocki
   Fei Liu
   Niels Lohmann
   Levi Lucio
   Olivia Oanea
   Martin Schwarick
   Marc Voorhoeve
   Jan Martijn van der Werf
   Matthias Wester-Ebbinghaus

Their work is highly appreciated.

Furthermore, we would like to thank the organizational team of the whole conference setting in Paris for their general support.

The organizational/technical work in Hamburg was supported by Yvonne Küstermann and Dimitri Popov.

Without the enormous efforts of authors, reviewers, PC members and the organizational teams this workshop wouldn’t provide such an interesting booklet:

Thanks!
# Contents

## Part I Invited Talk

1 A Petri Net-based Conceptual Meta-model for System Modeling  
*Christophe Sibertin-Blanc* ................................................................. 3

## Part II Full Presentations

2 Net Components: Concepts, Tool, Praxis  
*Lawrence Cabac* ................................................................. 17

3 Let’s Play the Token Game – Model Transformations Powered By Transformation Nets  

4 Composition of Concerns Using Reference Nets  
*Joao Paulo Barros, Isabel Sofia Brito, and Elisabete Soeiro* .................. 51

5 Modeling and Prototyping of Concurrent Software Architectural Designs with Colored Petri Nets  
*Robert G. Pettit IV, Hassan Gomaa, and Julie S. Fant* .................. 67

6 Schedule-Aware Workflow Management Systems  
*R.S. Mans, N.C. Russell, W.M.P. van der Aalst, A.J. Moleman, and P.J.M. Bakker* 81

7 Bounded Parametric Model Checking for Elementary Net Systems  
*Miekl Knapik, Maciej Szerer, and Wojciech Penczek* .................. 97

8 VerICS 2008 - a Model Checker for Time Petri Nets and High-Level Languages  
*M. Kacprzak, W. Nabialek, A. Niewiadomski, W. Penczek, A. Polrola, M. Szerer, B. Wozna, and A. Zbrzynz* ................................. 119

9 SAT-Based (Parametric) Reachability for Distributed Time Petri Nets  
*Wojciech Penczek, Agata Polrola and Andrzej Zbrzynz* .................. 133
Part III Short Presentations

10 Modeling with Net References and Synchronous Channels
Heiko Rölke ................................................................. 157

11 On the Multilevel Petri Nets-Based Models in Project Engineering
Sarka Kvetonova and Vladimir Janousek .............................. 173

12 On the Dynamic Features of PNtalk
Radek Koci and Vladimir Janousek ...................................... 189

13 UnitEd – A Petri Net Based Framework for Modeling Complex and Adaptive Systems
Marcin Hewelt and Matthias Wester-Ebbinghaus ................. 207

14 A Colored Petri Nets Model for the Diagnosis of Semantic Faults of BPEL Services
Yingmin Li, Tarek Melliti, and Philippe Dague ..................... 227

15 Synthesis of PTL-nets with Partially Localised Conflicts
Maciej Koutny and Marta Pietkiewicz-Koutny ..................... 247

16 Managing Complexity in Model Checking with Decision Diagrams for Algebraic Petri Net
Didier Buchs and Steve Hostettler .................................. 255

17 Model Analysis via a Translation Schema to Coloured Petri Nets
Visar Januzaj and Stefan Kogele .................................... 273

18 Transforming WS-CDL Specifications into Coloured Petri Nets
Valentin Valero, Hermenegilda Macia, and Enrique Martinez .... 293

Part IV Poster

19 Verification of Large-Scale Distributed Database Systems in the NEOPPOD Project
Olivier Bertrand, Aurelien Calonne, Christine Chappy, Silien Hong, Kais Klai, Fabrice Kordon, Yoshimori Okaji Emmanuel Paviot-Adet, Laure Petrucci, and Jean-Paul Sinets .............................. 315
